

ABUDAN

Aspiring Fullstack Web Developer | React & Node.js Enthusiast

DKI Jakarta, Indonesia | 0857-1006-3824 | abudanoffice@gmail.com | linkedin.com/in/abudan-abudan-1551a32a0 | github.com/Abudann

Informatics student at Universitas Nusa Mandiri focusing on Fullstack Web Development using JavaScript, React, and CSS. Currently completing the Coding Camp by DBS Foundation 2026 as a "Generasi Mandiri" Tech Talent. Have completed comprehensive Fullstack Web Development curricula at Dicoding Academy and Codepolitan. Possess a strong background in computer network infrastructure (LAN/WLAN, Mikrotik) from vocational high school, along with practical experience in building responsive dashboards and web applications. Creative, disciplined, and adaptable individual, with high enthusiasm for translating programming logic into interactive and user-friendly interfaces, contributing to the creation of digital solutions in the tech industry.

WORK EXPERIENCE

Fullstack Web Developer (Project-Based) — NusantaraLens

Feb – July 2026

Jakarta, Indonesia

- Developed the NusantaraLens web application integrating AI Assistant features with a focus on interactive UI/UX.
- Designed and implemented key front-end components such as Navbar, Hero, and AI Assistant.
- Built the application using React with Vite as the build tool, managing the local development environment and state management.
- Collaborated in a team to ensure smooth integration between front-end and back-end features.

Admin Dashboard Developer — UniQuest Project (PIKMI Competition)

Nov 2024

Universitas Nusa Mandiri, Jakarta, Indonesia

- Developed UniQuest, a platform for student attendance, activity history, behavior assessment, and reward systems.
- Built a responsive admin dashboard using ReactJS and Tailwind CSS.
- Worked collaboratively in a team with front-end and back-end task distribution for a campus tech innovation competition.

Network Technician (Internship) — Universitas Azzahra

Feb – Mar 2023

Jakarta, Indonesia

- Installed LAN cables and networking devices in several classrooms and laboratories.
- Conducted routine internet connection checks and network device troubleshooting.
- Assisted the IT team in drafting documentation for basic system configuration and management.
- Compiled daily operational reports as part of the industrial internship program.

EDUCATION

Universitas Nusa Mandiri — Bachelor's in Informatics

Sep 2024 – Sep 2027 (Expected)

- GPA 3.95/4.00
- Actively involved in application development, technology projects, and digital innovation competitions.

SMK Jakarta Timur 1 — Computer and Network Engineering

2021 – 2024

- Focused on computer networking, infrastructure installation, and operating system troubleshooting.

TRAINING & CERTIFICATION

Coding Camp by DBS Foundation — Participant

Feb 2026 – Present

- Participating in an industry-standard training program and completing certifications in the *Full-Stack Web Developer* curriculum covering: Programming Logic, Cloud Basics and Gen AI, Web Programming, JavaScript Programming, Web Applications with React, and Fundamental Back-End with JavaScript.
- Compiling and presenting weekly development progress (milestones) to the academic advisor.

Codepolitan — Fullstack Web Developer Class

- Completed a partial learning roadmap covering: Algorithms and Basic Programming, Using Terminal and Git for Development, UI/UX Web Design, Basic HTML & CSS up to Bootstrap 5 Framework, and Basic JavaScript Programming.

Dicoding Academy — Python & Data Visualization

- Completed intensive courses and earned certificates in: Starting Programming with Python and Learning Data Visualization.

National Professional Certification Board (BNSP) — Certificate of Competence

May 2024

- Achieved Level II Qualification Certification in Computer and Network Engineering from the Professional Certification Institute of SMK Negeri 7 Jakarta.
- Assessed as competent in various networking fields, including designing network topologies, configuring switches & routing (Autonomous System), installing wired and wireless infrastructure, and monitoring network system security.

SKILLS

Programming Languages & Frameworks: JavaScript, Node.js, Python, React JS, Redux, Express.js, React Native, HTML/CSS, Tailwind CSS

Database & API: MySQL, MongoDB, Redis, RESTful API

Computer Networking: LAN, WLAN, Mikrotik Configuration, Troubleshooting & Hardware Installation

Tools: Git & GitHub, Postman, Visual Studio Code, Vite, Microsoft Office

Languages: Indonesian (Native), English (Professional Working Proficiency)

Soft Skills: Time Management, Team Communication, Teamwork, Problem Solving
