

ABUDAN

Aspiring Front-End Web Developer | JavaScript & React Enthusiast

DKI Jakarta, Indonesia | 0857-1006-3824 | abudanooffice@gmail.com | linkedin.com/in/abudan | github.com/Abudann

Informatics undergraduate at Universitas Nusa Mandiri with a focus on front-end web development using JavaScript, React, and CSS. Currently completing the Coding Camp powered by DBS Foundation 2026 as part of the "Generasi Mandiri" Tech Talent program. Completed a comprehensive Fullstack Web Development curriculum at Dicoding Academy and Codepolitan. Brings a background in computer networking (LAN/WLAN, Mikrotik) from vocational studies, along with hands-on experience building responsive dashboards and web applications. Creative, disciplined, and adaptive, with a strong drive to translate programming logic into interactive, user-friendly interfaces and to contribute real digital solutions in the tech industry.

WORK EXPERIENCE

Fullstack Web Developer (Project-Based) — NusantaraLens

Feb 2026 – Present

Jakarta, Indonesia

- Developed NusantaraLens, a web application integrating an AI Assistant feature and focused on interactive, responsive UI/UX.
- Designed and implemented core front-end components, including the Navbar, Hero, and AI Assistant sections.
- Built the application using React with Vite as the build tool, managing local development environment, state, and live rendering via npm run dev.
- Collaborated with the team to ensure smooth integration between front-end and back-end features.

Admin Dashboard Developer — UniQuest Project (PIKMI)

Nov 2024

Universitas Nusa Mandiri, Jakarta, Indonesia

- Developed UniQuest, a platform for student attendance, activity history, behavior assessment, and rewards.
- Built the admin dashboard using ReactJS and Tailwind CSS.
- Worked in a team with divided front-end and back-end responsibilities for a campus-wide technology innovation competition.

Network Technician (Internship) — Universitas Azzahra

Feb – Mar 2023

Jakarta, Indonesia

- Installed LAN cabling and network devices across multiple classrooms and laboratories.
- Performed internet connectivity checks and troubleshoot network devices.
- Assisted the IT team with configuration documentation and basic system management.
- Compiled daily work reports as part of an industry training program.

EDUCATION

Universitas Nusa Mandiri — Bachelor of Informatics

Sep 2024 – Sep 2027 (Expected)

- Actively involved in application development, technology projects, and digital innovation competitions.

SMK Jakarta Timur 1 — Computer and Network Engineering

2021 – 2024

- Focused on computer networking, troubleshooting, and system infrastructure.

TRAINING & CERTIFICATIONS

Coding Camp powered by DBS Foundation — Participant

Feb 2026 – Present

- Following an industry-standard training program covering Programming Logic, Cloud fundamentals, Generative AI, Web Programming, and JavaScript.
- Compiling and presenting weekly progress milestones to a technical supervising lecturer.

Dicoding Academy — React & Fullstack Web Development

Completed

- Completed intensive coursework and earned certifications in: Belajar Dasar Pemrograman JavaScript, Programming Logic 101, Belajar Dasar Pemrograman Web, Belajar Fundamental Back-End dengan JavaScript, and Memulai Pemrograman dengan Python.

Codepolitan — Web Development Fundamentals

Completed

- Earned certificates in: HTML Dasar, CSS Dasar, Algoritma dan Pemrograman Dasar, and Mengenal Pemrograman Komputer.

Other Professional Certifications

- React Native - Membuat To-Do List App
- CI Software Development
- Software Engineering (SWE) - Universitas Nusa Mandiri

SKILLS

Languages & Frameworks: JavaScript, Python, React JS, React Native, HTML/CSS, Tailwind CSS

Networking: LAN, WLAN, Mikrotik configuration, Troubleshooting & Installation

Tools: Git & GitHub, Visual Studio Code, Vite, Microsoft Office

Spoken Languages: Indonesian (Native), English (Professional Working Proficiency)

Soft Skills: Time Management, Team Communication, Teamwork, Problem Solving
